

## Central Qualifications Accreditation Visit

18-20 February 2025

Report to the Veterinary Nurses Council of the Royal College of Veterinary Surgeons (RCVS)

## Accreditation Outcome for Central Qualifications

Central Qualifications submitted an application for accreditation of the following programme(s).

Central Qualifications Diploma in Veterinary Nursing – Small Animal

Central Qualifications Diploma in Veterinary Nursing – Equine

Following the meeting of the Veterinary Nurse Education Committee on 23 April 2025, Central Qualifications has been awarded full accreditation for five years. This decision reflects the compliance of the programme against the RCVS Standards Framework for Veterinary Nurse Education and Training. Central Qualifications is next due for re-accreditation in academic year 2029/30, however, this may change subject to quality monitoring.

### Classification of Accreditations

**Provisional accreditation** is granted for all AEIs with new qualifications that have made substantial progress towards meeting the accreditation standards. Once the first cohort of students completes the qualification, VNEC will be presented with all QM reports undertaken and consider the AEI for full accreditation. Students undertaking provisionally accredited qualifications may be required to pass the RCVS pre-registration examinations. Provisional accreditation will not normally be extended for more than two years, following the first cohort's completion. Provisionally accredited programmes are automatically deemed to be high-risk and will be audited accordingly.

**Full accreditation for 5 years** is given to qualifications that meet, or exceed, all the accreditation standards. Where a Provisionally Accredited programme has been awarded Full Accreditation, this will be for the remainder of the 5-year cycle. The RCVS will undertake a full programme review before the end of the agreed accreditation period.

**Full accreditation for a shorter period** is applied where deficiencies are identified in an existing programme; accreditation will be subject to the deficiencies being addressed within a set period. The RCVS will undertake a full programme review before the end of the agreed accreditation period.

**Probationary accreditation** is applied where a fully accredited programme is deficient in its resources or procedures and has failed to meet the RCVS Standards. Students may be required to pass the RCVS pre-registration examinations, as well as all qualification requirements, in order to be deemed competent in the RCVS Day One Competences and Skills. This will be at the discretion of VNEC and will be considered on a case-by-case basis.

**Terminal accreditation** is instigated where a programme is significantly non-compliant with the standards and has been unable to address the concerns within a timely manner. Students completing a programme which is assigned terminal accreditation may be required to pass the RCVS pre-registration examinations, as well as all qualification requirements. VNEC will communicate additional conditions to the AEI as required, depending on the rationale for the decision being taken. The programme will move into an exit strategy and specific details and evidence will be requested by the

Veterinary Nursing Department to maintain oversight whilst the final students complete the programme. The provision is quality monitored in accordance with a high-risk provider.

**Voluntary Terminal Accreditation** is applied where a programme has chosen to cease provision; students may be required to pass the RCVS pre-registration examinations dependent upon the rationale for the programme closure. Students are still required to complete all qualification requirements. The programme will move into an exit strategy and specific details and evidence will be requested by the Veterinary Nursing Department to maintain oversight whilst the final students complete the programme.

## Executive Summary

- Central Qualifications was visited between 18-20 February 2025. The following programmes were under accreditation review:

Central Qualifications Diploma in Veterinary Nursing – Small Animal

Central Qualifications Diploma in Veterinary Nursing – Equine

- The Visitors received a warm welcome from the staff and are grateful to all those who were responsible for preparing the visit, arranging the schedule, and providing supplementary information when requested. The enthusiasm, commitment, and pride of staff in what they do made it an interesting and enjoyable visit.

The team found the following:

- **Central Qualifications (CQ)** is to be **commended** for its excellent External Quality Assurance (EQA) processes; the development and implementation of the Vantage Quality Assurance (QA) system demonstrates CQ's commitment to ensuring the safety of people and animals across all learning environments and compliance with the RCVS Standards.
- **Central Qualifications (CQ)** is to be **commended** for the thorough analysis of the Objective Structured Clinical Examination (OSCE) assessment highlighting a proactive commitment to maintaining robust assessment practices and continuous improvement.
- **Central Qualifications (CQ)** is to be **commended** for its innovative approach of utilising multiple clinical supervisors simultaneously, as it demonstrates a strong commitment to ensuring comprehensive and effective student supervision.

Areas for further review include:

- Considerations for assessments to include further development of the OSCE assessor roles ensuring validity of the assessment decisions, and ensuring that all written assessments accurately reflect the appropriate weighting in accordance with the type and length of the programme.

The findings in this report are based on the RCVS panel's review. The panel are not the decision makers, and their commendations, suggestions and actions may be subject to amendment during the committee process.

This can be seen in the evidence provided AVVT <i>teaching observation</i> which confirms SVNs showed good knowledge regarding the CoPC.</p>

	<p>It is suggested that CQ emphasises sustainability in its evaluations of TPs in ways other than monitoring waste regulation, for example including this on the PLA forms.</p>			
<p><b>Conclusion:</b></p> <p>The evidence demonstrates that CQ has comprehensive policies and procedures to ensure the health, safety, and wellbeing of both people and animals. The Vantage QA system effectively monitors compliance at delivery sites and TPs. CQ supports student and staff wellbeing through internal initiatives and external resources, by raising awareness of its internal wellbeing policy, however, providing training for the Wellbeing Lead is recommended.</p> <p>CQ promotes professional competence through the integration of the RCVS Codes of Professional Conduct, evidence-based nursing, and interprofessional education. EDI policies and reasonable adjustments support inclusivity, although there is a suggestion to revise the PLA form to encourage proactive support for students with diverse needs.</p> <p>Overall, CQ and its delivery sites effectively support student empowerment, professional competence, and wellbeing, with opportunities for further enhancement through the suggested improvements.</p> <p>This standard has been met.</p>				
<p><b>Commendations:</b></p> <p>The development and implementation of the Vantage QA system demonstrating CQ's dedication to ensuring the safety of people and animals across all learning environments. The EQA team have demonstrated excellent commitment to quality assurance across all learning environments.</p> <p><b>Suggestions:</b></p> <p>1.2 – Consider making mental health resources more widely known within wellbeing policies and ensure the Wellbeing Lead is properly trained and supported.</p> <p>1.4 – Consider amending the TP posters to clearly state the client's right to withdraw consent for SVN involvement in the treatment of their pet.</p> <p>1.10 – Review section 3.8 of the PL form to encourage TPs to recognise and provide reasonable adjustments to support students' diverse needs.</p> <p>1.14 – Consider incorporating sustainability into TP evaluations.</p> <p><b>Actions:</b></p> <p>None.</p>				

## Standard 2 – Governance and quality

There are effective governance systems that ensure compliance with all legal, regulatory, professional, and educational requirements and clear lines of responsibility and accountability for meeting those requirements.

All learning environments optimise safety and equality, taking account of the diverse needs of, and working in partnerships with, students and all other stakeholders.

Standard met

This process is strengthened through the introduction of a Standard Operating Procedure (SOP). It is clear that the EQA process also ensures delivery sites follow these rules. CQ is advised to enhance the learner handbook by explicitly stating the requirement for students to undertake 1800 hours of practical training, in accordance with the Registration Rules.</p>	✓		
2.5	<p>Adopt a partnership approach, with shared responsibility, evidenced by a memorandum of understanding (MOU) between the accredited education institution and the delivery site and between the delivery site and the training practice. <p><b>Conclusion:</b></p> <p>CQ has provided reassurance that adequate governance systems are in place. It is evident that there is a robust and effective EQA process and that this is strengthened using the Vantage QA System.</p> <p>CQ has proven its adherence to all legal, regulatory, professional, and educational standards and implementation of RCVS guidance and standards. It is evident that CQ monitors all learning environments, ensuring the safety, equality, and diverse needs of students are prioritised. It is noted that strengthening and standardisation of documentation could further support students and CQ team members.</p> <p>This standard has been met.</p>				
<p><b>Commendations:</b></p> <p>Successful integration of the RCVS requirements into the Vantage QA system, demonstrating a strong commitment to maintaining RCVS standards and regulatory requirements.</p> <p><b>Suggestions:</b></p> <p>2.1 Review current appeals and complaints policies and ensure they align with current practices.</p> <p>2.3 Review documentation to ensure the acronym "RCVS" follows "Royal College of Veterinary Surgeons".</p>				

2.4 Consider enhancing the learner handbook by explicitly stating the 1800-hour requirement, to fully reference the RCVS Registration Rules.

2.5 Consider standardising the renewal process of the MOU between the delivery site and the training practice.

2.7 Identify whether additional guidance for delivery sites surrounding entry requirements may be beneficial, with a consideration for marketing and websites.

## Standard 3 – Student empowerment

Students are provided with a variety of learning opportunities and appropriate resources which enable them to achieve the RCVS Day One Competences and Skills for Veterinary Nurses and programme outcomes and be capable of demonstrating the professional behaviours in the RCVS Code of Professional Conduct for Veterinary Nurses.

Students are empowered and supported to become resilient, caring, reflective, and lifelong learners who are capable of working in inter-professional teams.

Standard met				
Accredited education institutions, together with delivery sites and training practices, must ensure that all students:

	<p><i>1.5c DipVN EQ assignment handbook draft</i></p> <p>The EQA team verifies, through student interviews, which DOS assessment simulation tasks are regularly conducted. CQ evaluates the use of simulation-based assessments on a case-by-case basis, allowing delivery sites to seek approval if they face challenges in completing a DOS practically. To prevent over-reliance on simulations, all DOS simulations must be approved by CQ. This ensures that simulation-based tasks remain appropriate for the programme and effectively support practical skill development.</p> <p>CQ provides a range of delivery and assessment methods designed to enhance student engagement and support learners with diverse needs. This approach is reflected in the <i>DipVN SA Assignment Handbook draft</i>, which presents two distinct assignment pathways that tutors can select based on their students' needs. Both pathways align with the same assessment criteria, and the differing scenarios were reviewed by the panel to ensure fairness and consistency. By offering multiple ways for students to demonstrate their learning, CQ ensures an inclusive assessment process that accommodates various learning preferences and maximises student success.</p>

Multiple resources are available to assist teaching staff and CSs in delivering effective feedback that fosters student growth. Evidence from the PB section of the CSL demonstrates that learners actively reflect on their performance, with additional reflection opportunities included in assessment material. The EQA reviews feedback within the CSL and provides comments, ensuring that feedback processes align with programme expectations.</p>

CQ requires evidence from delivery sites that the professional behaviours are integrated</p>	✓		

	throughout the teaching materials and assessments, and this is evidenced within the Vantage QA system. Additionally, the tutorial records evidenced comment on the PBs further embedding this standard into SVN's learning and development. CQ has also developed a PB and attitude guide which supports the development of PBs.			
<p><b>Conclusion:</b></p> <p>The evidence provided demonstrates CQ's strong commitment to supporting SVN's theoretical and practical training, ensuring access to necessary resources, and fostering an inclusive learning environment. Comprehensive documentation, such as learner induction checklists and qualification handbooks, alongside a variety of delivery methods, ensures that students receive clear guidance and support throughout their journey. It is evident that CQ ensures that SVN's are well-prepared for both academic and clinical challenges.</p> <p>Additionally, CQ's proactive approach to monitoring student progress and well-being, including the use of reasonable adjustment policies and ongoing feedback mechanisms, ensures that all students are supported in achieving their learning outcomes. The integration of professional behaviour evaluations, reflective practice, and constructive feedback further enhances students' development. Overall, CQ's comprehensive framework for learner support, assessment, and feedback fosters a robust educational experience for SVN's.</p> <p>This standard has been met.</p>

The Vantage QA system showed that the EQA team actively checks this requirement for delivery site staff, and it was encouraging to see scrutiny of timetables, particularly for staff new to veterinary nurse lecturing.</p> <p>There is a clear statement within the MOU outlining the requirement for CSs to be given protected time to carry out their duties, and the EQA team is seen to monitor compliance with this requirement.</p> <p>Following discussions at the accreditation event, it was positively noted that CQ is committed to expanding the EQA team in line with forecasted growth. To maintain the high levels of support currently provided, the panel suggests that an EQA delivery site/student allocation rationale is developed. This would help ensure that as the number of delivery sites expands, the EQA team can continue to provide consistent and effective oversight and support.</p>

	<p>It was noted that feedback from a delivery site standardisation meeting has been acted upon by CQ, demonstrating responsiveness to stakeholder input. OSCE examiner feedback is also gathered and reviewed during the post-exam moderation process. Following discussion with the QA Manager, it was clarified that if feedback indicated an inconsistent assessment decision, this was addressed immediately by the Exam Committee. More general feedback, however, is taken forward to assessor standardisation meetings to inform ongoing improvements in assessment practices.</p>

There are clear procedures for reporting and addressing issues, ensuring that appropriate action is taken when concerns arise. Additionally, educators and assessors are supported in managing these situations through established policies and guidance. The EQA team monitors these processes as part of their quality assurance checks,</p>	✓		

	helping to ensure that concerns are addressed in a timely and appropriate manner.

They also hold recognised teaching qualifications. To further enhance compliance with this criterion, the panel recommends amending the current wording in the <i>Centre Handbook</i> to explicitly state this expectation.</p>	✓		
<p><b>Conclusion:</b></p> <p>CQ demonstrates a strong commitment to quality assurance and continuous improvement by actively utilising feedback from centres, students, and employers to drive positive change. The organisation's structured approach to reviewing and supporting student progression ensures that learners receive the necessary guidance to succeed. Additionally, effective management and support for staff helps to balance workload demands, ensuring roles are fulfilled efficiently.</p> <p>This standard has been met.</p>

## Standard 5 – Curricula and assessment

Curricula and assessments are designed, developed, delivered, evaluated, and validated to ensure that students achieve the RCVS Day One Competences, Skills and Professional Behaviours for Veterinary Nurses, QAA HE Subject Benchmark Statements for Veterinary Nurses (HE) and outcomes for their accredited programme.

	<p>qualifications. These changes would enhance clarity for delivery sites, TPs, and students. For instance, VNSA1 1.3 aligns with DOS 1.4; however, there is a discrepancy where the DOS instructs to “critically evaluate a risk assessment,” while the qualification handbook requests “identifying risk factors and writing a risk assessment.” The panel suggests that both qualification handbooks are carefully reviewed to ensure these minor discrepancies are addressed, providing improved clarity.</p>

	<p>with the expected cognitive level of learners at this stage, promoting a balance between challenge and comprehension. Additionally, the assessments are designed to encourage critical thinking and application of knowledge while remaining clear and unambiguous to support fair and accurate evaluation.</p> <p>During the review, there was a discussion regarding the term “other activities” included in the Total Qualification Time (TQT), as it appeared vague. In response, the Quality Assurance Manager clarified that the Ofqual definition of “other activities” had been applied and was documented within the qualification handbooks. Additionally, the External Quality Assurance (EQA) team confirmed that these activities are reviewed as part of their annual sampling process, ensuring continued compliance and relevance.</p> <p>The panel also noted some discrepancies in the evidence provided for Paper 5, where the number of questions stated in the qualification handbook differed from the number stated in the question blueprint. This inconsistency created some confusion regarding the exact structure of the assessment. CQ must review the documentation to ensure the correct weighting of the assessments.</p>

Staff are committed to ensuring that assessments are valid, fair, and reliable. However, the evidence presented to the panel regarding the OSCE moderation is not sufficient to confirm that this requirement has been fully met.</p>			
--	---	--	--	--

	<p>CQ has a well-documented process for OSCEs, covering both pre- and post-examination procedures. The panel was presented with evidence demonstrating the robustness of the pre-examination process, including the development, expert review, and trialling of tasks. CQ utilises the Angoff method for setting pass marks, which is consistently applied during the post-moderation stage of the examination process.</p> <p>The panel is concerned about the validity of the decisions made on the results of the OSCE assessments because one of the QARs observing examiners during the OSCE is not an RVN or MRCVS (UK Practising). To explain further, while there is a bank of QARs undertaking quality assurance through the observation of examiners, it is questionable how this person can ensure that the clinical aspects of the assessment process is being checked. This, therefore, raises concerns about the validity of observations for checking examiner decision making.</p> <p>There is evidence that CQ has well-defined and robust processes for the design and delivery of Multi Choice Question (MCQ) and Short Answer Question (SAQ) examinations, providing the panel with confidence in the validity and reliability of assessment outcomes. A panel of experts is involved in this process, and the documented evidence effectively outlined the procedures for the accreditation panel.</p> <p>Additionally, a video presentation from CQ's Statistics Manager clearly explained how the pass mark is determined, including the handling of statistical outliers, such as exams with only one candidate. Post-examination processes involving the Exam Committee were also provided, demonstrating thorough discussions between the Lead Examiner and the External Advisor. These measures establish validity and robustness, ensuring that assessment decisions are well-supported and evidence based, with the exception of the OSCE process, as detailed above.</p> <p>For these updated qualifications, the panel was provided with an assignment handbook outlining two assignment options for learners. Tutors can choose from Option 1, Option 2, or a mixture of both, ensuring that all units and learning outcomes are covered. Each option is clearly referenced to the assessment criteria, with defined marking criteria and a structured grid for recording assessment decisions.</p> <p>Assignments from the current qualification were provided for review. These assignments demonstrated the full assessment process, including first marking, internal quality assurance (IQA), and external quality assurance (EQA). Based on this evidence, the panel is confident in the validity and robustness of the assessment process, supporting the decisions made based on the results of this form of assessment.</p>

These processes effectively maintain the integrity of the assessment system, providing assurance that all assessments are appropriately scrutinised to uphold high standards of academic rigour and fairness.</p> <p>Following a thorough review and discussion of the available evidence, the panel is not reasonably assured that the moderation processes for the OSCE exam session are in place to ensure the validity of the assessments.</p> <p>It was noted that a lead assessor (LA) is appointed for each OSCE. The role of the LA is to deal with technical queries. The panel noted that the LA is also an examiner for three of the OSCE stations and therefore it is unclear who is responsible for quality assuring the decisions made by the LA in their role of examiner. This lack of separation between roles</p>		✓

The handbook detailing the conduct of examinations is comprehensive, and evidence confirms that EQAs regularly review exam policies, including invigilation procedures, to maintain fairness and consistency. Furthermore, CQ has requested IQA sampling plans from delivery sites, and it is evident that assignments are included in the EQA</p>	✓		

	<p>sampling process, ensuring that the quality and integrity of assessments are upheld.</p> <p>During the review, it was noted that marked assignments from the current qualification included SVN names. While the updated assignment handbook mentions that “assignment marking grids allow for anonymous marking,” the use of anonymous marking is not explicitly required. The panel suggests that CQ further consider how they can minimise bias with delivery site marked assignments.</p> <p>Regarding OSCE examiner training, the panel acknowledges that considerations around bias have been addressed. CQ has commissioned a detailed report to substantiate its claim that the 1:3 OSCE assessor-to-task ratio does not influence bias. The inclusion of this report was a positive step in providing evidence-based assurance of assessment fairness. Following discussion, the panel were reasonably assured that this report marked the beginning of a review process, which would be revisited when changes occurred, such as when new examiners were introduced. However, when questioned by the panel, CQ was unable to elaborate on the author of the report. Clarification on the credentials and expertise of the report’s author would further strengthen the validity of these findings.</p>

## Standard 6 – Effective clinical learning

All students are provided with safe, effective, and inclusive clinical learning experiences. Each clinical learning environment has the governance and resources needed to deliver education and training. Students actively participate in their own education, learning from a range of people across a variety of settings.

	<p>CQ ensures the involvement of the whole veterinary team in all students' clinical learning environments through the encouraged use of witness statements.</p> <p>As previously mentioned, the use of multiple CSs allows a student to receive further support from within the veterinary team.</p>			
<p><b>Conclusion:</b></p> <p>CQ has demonstrated that all clinical learning environments are equipped with the necessary governance and resources to provide education and training for veterinary nursing students. The team ensures that students are provided with an expansive range of TPs. The diverse needs of students are considered, and procedures are in place to support effective, safe, and inclusive learning. The programme actively encourages students to learn from a range of people across a variety of settings.</p> <p>This standard has been met.</p>				
<p><b>Commendations:</b></p> <p>The innovative approach to clinical supervision, as the panel recognised that allowing students to access multiple clinical supervisors simultaneously removes barriers and enables the wider veterinary team to contribute to supervision and learning.</p> <p><b>Suggestions:</b></p> <p>6.4 – Review and enhance documentation to emphasise the considerations that may need to be addressed for non-employed students in relation to employment legislation.</p> <p><b>Actions:</b></p> <p>None.</p>
